

OTHMANE ER-REFALY

Software Engineering Student

Othmanerefaly@gmail.com — +212 6 97 52 37 44 — Morocco

Profile

Dedicated Software Engineering student at 1337 School (42 Network), currently at Level 11.67. Strong problem solver with hands-on experience in C, C++, system architecture, and full-stack development. Autonomous learner with a solid technical foundation and prior background in architectural design and building drafting.

Education

1337 School (42 Network)

2023 – Present

Computer Science — Campus: Benguerir

Level: 11.67

OFFPT Laayoune

2020 - 2023

Dessinateur de Bâtiment (Building Draftsman)

- Architectural design and technical drawing for residential and public buildings.
- Produced 2D plans and 3D models using **AutoCAD**, **ArchiCAD**, and **Revit**.
- Created realistic architectural visualizations using **Twinmotion**.
- Participated in on-site construction work to understand execution and building processes.
- Completed a **6-month professional internship** in the construction and architectural field.
- Final project: full architectural design and technical study of a **train station building**.

Selected Projects

ft.transcendence

Apr 2026

Built a full-stack web application with JWT and 42 OAuth authentication, real-time dashboard updates using SSE, developed with NestJS, TypeScript, Prisma, and PostgreSQL.

Inception

Dec 2025

Designed and deployed a Docker-based infrastructure using Nginx, WordPress, and MariaDB.

cub3d

May 2025

Implemented a 3D game engine using raycasting techniques (Wolfenstein 3D style) with MiniLibX.

minishell

Dec 2024

Recreated a functional Unix shell in C, including parsing, execution, pipes, and signal handling.

Technical Skills

Programming: C, C++, TypeScript, Shell

Web & Backend: NestJS, Prisma, PostgreSQL

Systems: Linux, Docker, System Architecture

Architecture Tools: AutoCAD, ArchiCAD, Revit, Twinmotion

Tools: Git, Vim

Languages

Arabic — Native

English — Advanced

French — Intermediate
